

Gegeben sind Dreiecke mit Höhen (nicht maßstabsgerecht). Bezeichne **Ecken, Seiten und Höhen!**  
 Berechne mit den gegebenen Stücken den **Flächeninhalt** mit **ausführlichem** Rechenweg (**ohne TR!**)

1.)  $A = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$A = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

2.)  $A = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$A = \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

3.)  $= \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$= \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

4.)  $= \underline{\hspace{2cm}}$

5.)  $= \underline{\hspace{2cm}}$

6.)  $= \underline{\hspace{2cm}}$

7.)  $= \underline{\hspace{2cm}}$
